EXPERIENCE

Full Stack Developer Intern (Nov 2019 -) Flindel – Toronto, Ontario

- Improved company's web application's stability by making unit tests
- Aided in the GUI design for one of the company's software

Full Stack Developer Intern (2019) XR Web – Toronto, Ontario

- Improved company's web application UI experience using React.
- Resolved bugs and issues, refining user experience while using application.

General Assistant/IT Support (2015 - 2019) Community On The Mount (COTM) – Markham, Ontario

- Increased functionality on the organization's WordPress website (cotm.co) by securely deploying CSS, JavaScript and HTML code.
- Upheld smooth workflow in the organization's activities by providing IT support for network connectivity, setup Windows desktops, and prepare audio-visual equipments.
- Added value to the organization by creating audio-visual assets using Adobe Creative Suite. (Premiere Pro, Photoshop, After Effects).
- Enriched website by publishing 100+ audio-visual resources.

PROJECTS

Order Management System for Asset Managers (Volunteer) *(React, Node.js, Express, MySQL, Bootstrap, Alpha Vantage API)*

App built for asset managers, used for managing asset portfolios and staging stock trade orders.

- Setup Express server: Learned how to setup environment with MySQL as the model and React as the view.
- Designed REST API: Designed and coded endpoints to perform CRUD operations to MySQL database.
- URLs: <https://bomssystem.herokuapp.com/oms> ; <https://github.com/Chestirito/oms>

Day Planner (Boot Camp) *(Node.js, Express.js, MySQL, Full Calendar NPM)*

Calendar web app where users can login and add events to a calendar and check details for each day.

- Setup backend Express server which contain configurations for Sequelize ORM with MySQL database.
- Display calendars with events containing information retrieved from the database.
- URLs: <https://github.com/Chestirito/day-planner>

Super Heroes Database (Boot Camp) *(eBay API, Comic Vine API, AJAX, JavaScript, Material UI)*

App built for newcomers to finding information and merchandise for any superhero.

- Used documentation to learn how to use eBay API and setup routes to retrieve information as needed.
- Learned how to use ComicVine API through documentation, and setup routes to retrieve desired information.
